SUMMARY

Full-Stack Web Developer with a love for creating responsive, user-friendly websites. I have an extensive background in hospitality and sales, but I am excited to push forward with my passion for problem solving and creating applications.

TECHNICAL SKILLS

Languages:
- HTML
- CSS
- JavaScript
- MySql

PROJECTS

Feed Me |
https://github.com/a-andres1/feed-me-tm.git
| https://a-andres1.github.io/feed-me-tm/

- The goal with this application was to help people complete the arduous task of picking a restaurant for dinner.
- I worked on the frontend by creating the UI.
- HTML, CSS, JavaScript, Google Maps API, UIKit, Zomato API

A Generation of Password |
https://github.com/Tylergilbert913/A-Generation-of-Passwords.git |
https://tylergilbert913.github.io/A-Generation-of-Passwords/

- The goal of this application was to create a password generator. You simply select what type of and how many characters you want for your password when prompted.
- I worked on the frontend of this application to create the JavaScript needed for it to function.
- HTML, CSS, JavaScript

HomeGrown |
https://github.com/caitie-gorham/project-2.git |
https://homegrown-app-grizzlies.herokuapp.com/

- The goal of this application was to make the lives of new plant owners easy. This application will hold all the houseplants you care for within your home, which then gives

you all vital information needed for caring for them. You can also add notes to the plants you've selected to add to your greenhouse.
- I was mostly responsible for the UI of this application, but bounced around to help out with api routes and with other task on the backend.
- HTML, CSS, JavaScript, Express.js, MySql, Handlebars.js, Bootstrap
